Multimedia Box is Joomla 1.0.x and Joomla 1.5.x content plugin. It is combined from 2 great scripts. Smoothbox by <http://gueschla.com/labs/smoothbox/> and

Moviebox script from <http://dutchmoney.com>. The plugin displays your videos from Youtube , Google Video , MP4 ,WMV ,ASF, MOV in a video pop up box. You can also display your Images, gallery, inline content , Iframe content and more. The script is easy to use and it gives flexible Web 2.0 appearance to your Joomla website. Install as any Joomla plugin (mambot) .The plugin is XHTML and CSS valid. This plugin is licensed under GPL license and is free to use on any Joomla website.

The new version 1.0.2 for Joomla 1.0.x and 1.5.4 for Joomla 1.5.x

Includes following bug fixes:

Moviebox revisions :

1.10: fixed PC firefox closing bugs
added options for link colors
added support for mp4/youtube/wmv/partial asf
a few minor efficiency enhancements
added title support

1.11: fixed error with IE image links

1.12: added error handling to activeX checks
improved WMP detection on PC
IE6 scroll/positioning fixes

Multimediabox 1.0.2
